Please read this before sending us artwork

Please do

- ✓ **Crop your image to the correct proportions for the final output size.**
- ✓ **Use .pdf, .ai or .eps vector files or .tiff bitmap files. Bitmaps to have a resolution between 150 dpi and 300 dpi at 50-100% of "finished size".**
- ✓ **Convert any text to curves or include the font with your image.** (Fonts must be Microsoft Windows compatible)
- ✓ **If specific colours are required send us an accurate printed colour sample for us to match, or tell us the Pantone colour reference for the colour you want.**

Do not

- ✗ **Assume that image proportions can be changed without cropping the image.**
- ✗ **Assume that the colours you see on the monitor will be the colours we print.**
- ✗ **Create files with either very high or very low resolution.**

Remember

- **Pantone colours are printed using CMYK process equivalents.**
- **Specify which file to use when sending multiple files.**
- **Accurate colour matching may not be possible with bitmap artwork.**

The **best output** comes from the **best original artwork**

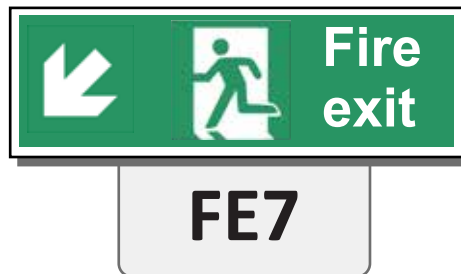

Using the latest printing technology with durable inks we can produce LARGE printed signs to include just about anything. By using printers like the ones shown here, we can produce high quality, durable exterior grade signs very quickly.

We can work with a variety of images including original artwork and various types of computer files. If you need any assistance regarding the types of files we prefer, please call our sales team who will be pleased to offer advice.

One of our most popular uses for digital printing is the production of sign boards showing large artists impressions. We can produce these beautiful and striking artists impressions with artwork supplied direct from the architect, using their original artwork.

If you think that full colour printing could help you to improve the quality of your visual displays, then give us a call. We would be happy to help you with any questions, and would be pleased to quote for any specific requirements that you may have.

Need to find the exit quickly? Why not let these signs guide you. These signs provide a clear and easy to understand method of showing the best way to the nearest Fire Exit. This range of Fire Exit signs conforms to all of the relevant European and British standards. Whether you want to sign an office or a warehouse we are sure you will be able to find the product to suit your needs.

Standard Sizes

3" x 12", 4" x 18", 7" x 10", 12" x 12",
14" x 10", 12" x 16", 12" x 18", 18" x 24",
16" x 20", 24" x 24", 24" x 36"

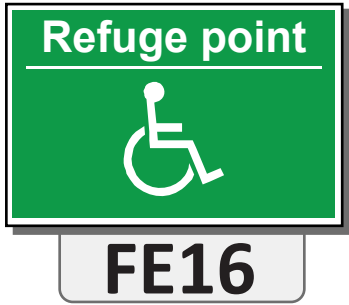

Key to material types

Adhesive Vinyl
1 mm PVC
3 mm rigid plastic

Corroplas
Aluzinc
Aluminium composite
Fibre Brite

This range of fire exit signs still clearly shows the direction to the nearest exit without using text. This means that these are universal, regardless of what language the viewer understands. Also shown below are some other signs related to fire exits and fire assembly points.

All modern fire extinguishers have a red body. To avoid confusion there are colour codes to help you identify the different types. The Colour Code signs below display all the necessary information to identify each type of extinguisher. These signs contain essential information about which extinguisher to use on different types of fire e.g. Wood, electrical, gas, etc.

Luminous Fire Equipment Signs

Luminous signs are printed on high quality material which will glow for a short period of time after lighting has failed, or been switched off. The material we use has achieved Class 1 rating against the industry standard. The material can be "recharged" an unlimited number of times by exposure to a light source. This Photo Luminescent material is non-toxic, non-radioactive and presents no environmental hazard.

Signs for Staff

These signs have been designed to meet best practice recommendations for people living with dementia. Designed to blend in with the background these signs are far less likely to be noticed by care home residents whilst still providing the necessary information for staff and visitors. These signs are manufactured on a 3mm thick foam PVC with adhesive backing.

One way vision film
Self adhesive for direct application to bodywork.
3mm PVC, for use inside vehicle windows.
Magnetic Sheet, for application to steel bodywork.
Aluminium for permanent fixing.

We can supply heavy duty rubberised banners in many different shapes, sizes and colours. From simple text to near photo quality images we can do it all. Because banners are so easy to roll up and store they are a great way of advertising events. Even if your banner is used once a year it can be rolled up and then be used again and again.

Shown here are some traffic signs that are popular with our customers. The signs shown here are listed as 11g aluminium as this is requested most often. If you require these signs in a different material, or like the style of one of these signs but want to change the text, that isn't a problem. Just give us a call to discuss your requirements.

Sign Posts, Caps & Fixings

Here we supply high quality lightweight post fixing clips to provide you with a very strong and practical way of mounting your signs onto posts. All of our posts are aluminium giving you good durability and strength but without the excessive weight of steel. We supply our posts in two diameters, (3") and (2") (both available at various lengths), plus many different variations of fixings to suit your needs. **For more details and prices please contact our sales team.**

Minicades

The Minicade Freestanding Signs are a slim line external grade A-frame sign stand that is perfect for any thin or narrow space. With the ability to be internally ballasted with sand they provide a stable and compact external sign frame system. Minicades fold flat for easy storage and come complete with a built in carry handle. Suitable for either internal or external use.

Signicades

Signicade Freestanding Signs offer a large sign graphic area of 36" tall x 24" wide providing a bold and striking display. Signicades are recommended for both internal or external use and will accept sand ballast internally. These are the biggest freestanding signs that we sell (graphic area) and, like the Squarecade signs are suited to many location and applications.

Standard Materials

Aluminium 20 gauge:

Excellent durability for internal and external applications. Pre-drilled for easy application.

Aluminium 14 gauge:

Tough and durable aluminium for use where the British standard does not apply.

Aluminium 11 gauge:

Typically used for Road Signs, excellent durability and strength.

Self Adhesive Vinyl:

Flexible PVC with a permanent adhesive backing.

Semi-Rigid PVC:

Gloss PVC of 1mm thickness.

Rigid 3mm PVC:

Tough lightweight rigid foam PVC.

Rigid 5mm PVC:

Tough lightweight rigid foam PVC ideal for larger signs.

Zintec:

Zinc coated steel, typically for temporary road signs, and can be supplied with frames.

Magnetic:

2mm thick, ideal for non-permanent application of signs to ferrous materials.

Correx/Siteboard:

Lightweight corrugated PVC product used for short life signs. Either supplied as the standard 4mm thick product, or as the ultra strong 10mm material.

Photoluminous:

Glow in the dark material.

Reflective:

Reflects light back at the viewer.
